### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art discloses a control apparatus for an automotive generator having a field coil, a switching diode for turning on/off a current supply to the field coil and a flywheel diode connected in parallel with the field coil. However, the prior art fails to disclose, in combination with the invention, a voltage detection circuit for outputting an instruction signal to turn on/off the switching device so that an output voltage of the automotive generator is regulated to a specified adjusted voltage and a drive circuit for driving the switching device when the instruction signal instructing the switching device to turn on is input from the voltage detection circuit, by only flowing a specific current to a control terminal of the switching device to raise a control terminal voltage until a terminal voltage of the field coil exceeds a specified value and applying a voltage higher than the output voltage of the automotive generator to the control terminal after the terminal voltage of the field coil exceeds the specified value and the drive circuit having a charge pump circuit having an even number of capacitor stages, a current supply circuit for supplying a current to the charge pump circuit, a signal for intermittently operating the charge pump circuit, and a diode connected in a forward direction from an input to output terminals of the charge pump circuit and the conduction instruction

signal is input from the voltage detection circuit, the drive circuit supplies the specific current from the first current supply circuit to the gate terminal until the terminal voltage of the field coil exceeds the specified value, and supplies an output voltage of the charge pump circuit to the gate terminal after the terminal voltage of the field coil exceeds the specified value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
